Function / Attribute	Purpose	Example
`np.array()`	Create an array	`np.array([1, 2, 3])`
`np.arange()`	Generate a range of values	`np.arange(1, 10)`
`np.zeros()`	Create an array of zeros	`np.zeros((2, 3))`
`np.ones()`	Create an array of ones	`np.ones((2, 3))`
`np.linspace()`	Generate equally spaced values	`np.linspace(0, 10, 5)`
`np.identity()`	Create an identity matrix	`np.identity(3)`
`np.random.random()`	Generate random values	`np.random.random((2, 2))`
`.ndim`	Get the number of dimensions	`arr.ndim`
`.shape`	Get the shape of an array	`arr.shape`
`.size`	Count all elements	`arr.size`
`.dtype`	Get the data type	`arr.dtype`
`np.max()`	Find the maximum	`np.max(arr)`
`np.min()`	Find the minimum	`np.min(arr)`
`np.sum()`	Calculate the sum	`np.sum(arr)`
`np.prod()`	Calculate the product	`np.prod(arr)`
`np.mean()`	Calculate the mean	`np.mean(arr)`
`np.median()`	Calculate the median	`np.median(arr)`
`np.std()`	Calculate standard deviation	`np.std(arr)`
`np.sin()`	Calculate sine	`np.sin(arr)`
`np.cos()`	Calculate cosine	`np.cos(arr)`
`np.tan()`	Calculate tangent	`np.tan(arr)`
`np.log()`	Calculate natural logarithm	`np.log(arr)`
`np.exp()`	Calculate exponential	`np.exp(arr)`
`np.round()`	Round values	`np.round(arr)`
`np.floor()`	Round down	`np.floor(arr)`
`np.ceil()`	Round up	`np.ceil(arr)`
`.reshape()`	Change array shape	`arr.reshape(2, 3)`
`.T`	Transpose an array	`arr.T`
`.ravel()`	Flatten an array	`arr.ravel()`
`np.dot()`	Calculate a dot product	`np.dot(a, b)`
`np.hstack()`	Stack horizontally	`np.hstack((a, b))`
`np.vstack()`	Stack vertically	`np.vstack((a, b))`
`np.hsplit()`	Split horizontally	`np.hsplit(arr, 2)`
`np.vsplit()`	Split vertically	`np.vsplit(arr, 2)`
